

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

AUTHOR CATALOGUE  
OF THE  
LIBRARY  
OF  
TEIKOKU-DAIGAKU  
(IMPERIAL UNIVERSITY)

TŌKYŌ  
PRINTED BY THE LIBRARY  
2551 (1891)

# PREFACE.

This is the catalogue of all the European books, contained in the Library of the Imperial University at the end of the year 2547, when the work of cataloguing was commenced. The work has been continued since that time and, although, in the meantime, some imperfections and defects have been found to exist, not only in matters of detail, but also in the plan itself, no changes have been introduced except where absolutely necessary; for, if the catalogue were not of a homogeneous nature, it would lack symmetry in form and be practically inconvenient. Moreover, it has been the general desire of University members to have a catalogue printed without delay, even in an incomplete form, rather than to wait for years for a perfect one. This has also prompted us to publish the catalogue in the present form notwithstanding its incompleteness and imperfection.

---

In this catalogue, the plan of "author catalogue" is adopted and books are arranged according to the alphabetical order of the authors' names, being entered under:—

1. *Surnames*, when known.
2. *Pseudonyms*, when real names are not ascertained.
3. *Names of countries, cities, societies*, or other *bodies*, responsible for their publication.
4. *First word* (not an article, preposition, or serial number) of the titles of periodicals and of anonymous books, whose authors are not found.

And in the headings, English and French names beginning with a *prefix* (as *De* or *Van* in the former and *L'*, *Le*, *La*, *Du*, or *Des* in the latter) are recorded under the prefix. But French *de* or *d'* and the *prefix* in all other languages, are to be found under the names following the prefix.

The German *ä*, *ö* and *ü* are not always written *ae*, *oe* and *ue*, and, when not so written, are arranged as *a*, *o*, *u*.

*Capitals* are used only in proper names and at the beginning of a new sentence or a book title.

A single *dash* shows the omission of the preceding heading and a subsequent dash, that of the subordinate heading.

---

In conclusion, it may be remarked that a good catalogue must furnish complete answers to, at least, two sets of questions:—First, Is there in the library such a book by a certain author (*A*), or on a

given subject (*B*)? Second, What books by a certain author (*a*), or on a given subject (*b*)?—the best catalogue being one that can answer the most questions with the least trouble. However, as this catalogue is intended to answer only the questions *A* and *a*, it is necessary to accompany it, at least, with a brief subject-index, which, if it does not fully answer the questions *B* and *b* as a thorough “subject catalogue” would, still affords the means of finding books by subjects. Such an index is now in preparation and will be published before long.

TEIKOKU DAIGAKU TOSHOKWAN.

*March, 2551.*
